Attar is a Farsi word meaning "fragrance, scent, or essence." These Attar perfume oils are based on ancient formulas and are usually blends of several oils, resins, or absolutes, placed in an unscented base oil. These are similar to the essences used for centuries by women and men of the East to create true spiritual sensuality. The beauty of using a perfume oil is that simply by wearing it you create an aura of tranquility, compassion, and mystery around yourself. The scent stays "close" to your body, so your fragrance does not travel across the room. You will be amazed at the compliments you'll receive when using our famous scents. People will stop you and ask, "What are you wearing?" Attar Bazaar was the pioneer of attar perfume oils in the United States. Since their beginning some 28 years ago more than 10,000,000 people have used and loved these elegant products. Now the pleasure is yours ...
